AQUA SERIES 1810

Non-Glazing Acidic Fountain Concentrate

Description:

A low VOC, acidic fountain concentrate designed to eliminate calcium build-up on the rollers and keep calcium from depositing on blankets and plates. *AQUA SERIES 1810* contains desensitizers and wetting agents that provide excellent ink and water balance on all types of sheetfed presses

Instructions:

Start with 25 mL of *AQUA SERIES 1810* to each liter of press water. Increase dosage by 10 mL per liter if sensitivity occurs and decrease dosage if ink stripping occurs. The pH will be between 3.8 and 4.2 and the conductivity will increase by 780

micromhos for each 10 m/L of chemistry over the water's conductivity. Use *AQUA SERIES 1810* with an alcohol replacer to eliminate the use of alcohol.

Specifications:

Appearance	: Clear to pale yellow
VOC Content	: 84 g/L
Flash Point	: None
