

TOPAZ

FOUNT 156

Fountain Concentrate for all type of Sheetfed Presses

Description:

A sheet fed fountain concentrate designed for use on all types of presses. The FOUNT 156 should be used with either isopropyl alcohol or an alcohol replacer such as TOPAZ Eco AL-GREEN. This product contains additives to help control ink and water balance by providing low water settings and minimizing ink attack. The FOUNT 156 also contains agents to help control calcium related issues such as glazing and roller stripping.

Instructions: Start with 20 mL per liter of FOUNT 156. Increase dosage if sensitivity occurs, decrease dosage for ink stripping and color variation. Each 10 mL per liter of FOUNT 156 will increase the conductivity by 600 micromhos over the water. The pH is buffered at approximately 4.6. Mix with

either isopropyl alcohol or alcohol replacer such as TOPAZ Eco AL -GREEN for best results.

Benefits:

- Provides excellent ink and water balance
- Reduces ink feed
- Reduces ink attack
- Fights calcium related issues due to paper and ink
- Effective on all types of dampening systems
- Lowers water settings
- Low VOCs
- Quick re-starts for reduced paperwork
- Controls growth

Specifications:

Appearance / Odor : Colour Less / mild odor
Flash Point (TCC) : None
