LIQUID GOLD™ 2000

2% Mild Acid Fountain Concentrate for Brush Dampening

Description:

A mild acid fountain solution for use in the coldset and heatset applications. *LIQUID GOLD 2000* is designed to be used on presses equipped with brush and spray dampening systems. This product allows for more stable ink and water settings, excellent desensitizing of the non-image area, and additives that fight blanket buildup. *LIQUID GOLD 2000* is specifically designed to produce cleaner sharper print quality with fewer toning and emulsification issues, while maintaining low water settings. This fountain concentrate contains a unique blend of components to fight ink build up and feedback issues.

Directions for Use:

Mix 2% or 20 ml of *LIQUID GOLD 2000* to each liter of water. Increase dosage if plate sensitivity is occurring. Decrease dosage if ink emulsification or roller stripping is a problem. The conductivity will increase by 775 micromhos/cm over the water's conductivity for each 1% of added *LIQUID GOLD 2000*.

Specifications:

Appearance	: Clear blue liquid
Density	: 1.116 Kg/L
Conductivity	: 775 micromhos/cm per 1 %
pH, diluted	: 4.5-5.5
VOC Content	: 100 g/L
