## TZ SPW-M

### Side / Flap Pasting Application

#### Description:

Topaz TZ SPW-M is a water based synthetic adhesive of Vinyl Acetate Ethylene Copolymer developed for Side and Flap pasting. Suitable for automatic wheel type pasting application.

#### Characteristics:

Polymers type	: Vinyl Acetate Ethylene
Solid content	: 55% ( $\pm$ 1%)
Brook field Viscosity	: 3000 –8000 cPs (30°C SPD#4 RPM #20)
pH	: 4.0 - 6.0
Film Properties	: Transparent, Clear

#### Applications & Features:

Topaz TZ SPW-M is used for Side Pasting and

Flap Pasting. Side pasting of all types of Cartons. Surfaces allowed plain, printed, varnished.

Fast Drying and higher coverage. Suitable for wheel application due to excellent flow property.

**Note:** It is advised to close the lid after removing the adhesive from the drum to avoid skin formation and contamination.

If dilution is required then only softened or Demineralised bacteria free water should be used.

**Stability:** Topaz TZ SPW-M has a long shelf life of 6 months provided it is stored in cool/Shady place.

**Packing:** Topaz TZ SPW-M is available in 50 Kgs & 200 Kgs.
