

TOPAZ

TZWL 45

BOPP & PVC Film Lamination

Description:

Topaz TZWL 45 is an aqueous dispersion of polyvinyl acetate-acrylate Co polymers developed for BOPP & PVC film print lamination.

Characteristics:

Appearance	: Milky White
Polymers type	: Emulsion
Solid content	: 44 - 46%
Brook field Viscosity	: 3000 – 6000 cPs
RVDV-E Sp 4/20	
pH	: 4 - 6
Film Properties	: Transparent

Properties & Applications:

Topaz TZWL 45 is a medium viscosity product having good flow Good wetting and good machinability.

Topaz TZWL 45 is suitable adhesive for BOPP/ PVC

film & printed paper /board lamination which gives glossy and clear coating with good bond strength.

Storage & Handling:

Topaz TZWL 45 can be stored in poly lined or SS containers. To have a longer shelflife the container should be kept tightly closed in cool but frost free place. The product canbe easily washed off with water before the film dries up. In some case warm water withlittle scrubbing is required. In the event of the product coming in the direct contact witheyes or skin washing with plenty of water should be restored. For any abnormal symptoms seek medical advice

Stability: Topaz TZWL 45 has a long shelf life of 6 months provided it is stored in cool place.

Packing:Topaz TZWL 45 is available in 50 Kgs & 225 Kgs
