## UNITROL® 1200

Mild Acid Sheetfed Fountain Concentrate

### Description:

A sheetfed fountain concentrate designed for use on all types of presses. The *UNITROL 1200* should be used with either isopropyl alcohol or an alcohol replacer such as RBP's *AQUANOL® 2010*. This product contains additives to help control ink and water balance by providing low water settings and minimizing ink attack. The *UNITROL 1200* also contains agents to help control calcium related issues such as glazing and roller stripping.

### Directions for Use:

Start mix at 30 ml/L and increase by 10 ml/Liter if plate sensitivity or high water settings are a problem. Decrease by 10 ml/L if roller stripping occurs. Every 10 ml/L of *UNITROL 1200* will increase the conductivity by approximately 675

micromhos over the water's conductivity. The *UNITROL 1200* is buffered and will provide a pH value of between 4.5 – 5.5.

### Benefits :

- Provides excellent ink and water balance
- Reduces ink feedback
- Reduces ink attack
- Use with alcohol or an alcohol replacer such as *AQUANOL 2010*
- Fights calcium related issues due to paper and ink
- Effective on all types of dampening systems and presses
- Lowers water settings

### Specifications:

Appearance : Clear blue liquid  
VOC Content : 144 g/L
