## UNITROL® STAR

One Step Premium Sheetfed Fountain Concentrate

### Description:

A new, low dosage one-step acid fountain concentrate for all types of sheetfed presses and dampening systems. *UNITROL STAR* contains unique additives to help control and maintain water settings for excellent print quality. This one step fountain concentrate was specifically designed to replace alcohol and/or alcohol replacers on sheetfed presses and is compatible with conventional as well as UV inks. *UNITROL STAR* has a unique blend of wetting agents to control ink feedback and help stabilize the ink and water balance.

### Directions for Use:

Start Mix at 3 % by volume or 30 ml of *UNITROL STAR* to each liter of water. Increase dosage if

plate sensitivity, piling, or high water settings is occurring. Decrease dosage if ink emulsification or roller stripping is a problem. The conductivity will increase 400 micromhos/cm over the water's conductivity for each percent of added *UNITROL STAR*.

### Specifications:

Appearance	: Clear blue green liquid
Density	: 1.0 Kg/L
Conductivity	: 400 micromhos/cm per 1%
pH, diluted	: 3.7 to 4.5
VOC Content	: 450 g/L
